UNDERGRADUATE AT THE OPEN UNIVERSITY OF SRI LANKA

Aspiring Research Software Engineer and exploring concepts about Databases, Data-Driven Technologies, Artificial Intelligence, and Machine Learning. Actively developing projects focused on full-stack development and integrating AI features, especially using the MERN stack and Python. Currently, working on my innovative project "MindBou", an article-sharing platform and aspire to contribute to cutting-edge projects that shape the future of technology, with a strong academic foundation.

PROJECT BASED EXPERIENCE

MindBou   **Aug 2024 - Present**
Developer & Founder
An article-sharing platform currently under development that is designed to connect readers and writers through engaging content on various topics.
- Working with React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Git and Github

MediMate   **Mar 2024 - Feb 2025**
Developer
A web-based medical appointment system that optimizes the scheduling workflow for both healthcare providers and patients. It offers features such as appointment scheduling, patient profiles, feedback and robust security measures.
- Worked with JavaScript, EJS, Node.js, Express.js, Bootstrap, MondoDB and Github
